Course Details

This course begins by introducing the layout and interface of Microsoft Word 2010 including the Backstage view, the Navigation Panel for managing headings and finding objects and text as well as for updating page numbers and dates, the customizable Ribbon, text and image formatting options, live collaboration and cloud storage tools, and much more. The course will then teach you how to customize your workspace and create complex documents using Word 2010.

Upgrading your Word processing skills with this course will provide you with an excellent return of your time and energy. For those of you who have completed ABC IT, our comprehensive introductory computer course, the MS 2010 Word course is the perfect next step. Aside from learning the complete basic functions of Word 2010, you will also learn how to use keyboard shortcuts with Access Keys and Key Combos.

This course will be of great interest to all Microsoft Word users who wish to increase their productivity and enhance their document presentation skills without increasing their workload.
